INNOVATORS HARD AT WORK

A passion for problem solving drives innovation at Rainier Industries. We're a uniquely diverse company, designing and manufacturing a wide variety of display, fabric and shelter solutions. New designs constantly emerge to meet unique customer demands.

Rainier is a workplace of diverse and complementary capabilities, driven by employees dedicated to producing the highest achievable quality.

A TRADITION OF QUALITY

Rainier was established in 1896, making rugged tents for prospectors headed north to the great Alaskan gold rush. The company has greatly evolved from its roots, but our tradition of quality and customer satisfaction hasn't changed.

AWNINGS AND CANOPIES

As practical as they are beautiful, custom awnings and canopies from Rainier can enhance visibility, update architecture and protect businesses and their customers from the elements. Complete awning solutions include design, permitting, engineering, fabrication, electrical and installation. Rainier consistently sets industry standards with cutting-edge manufacturing techniques that are recognized worldwide.

TENSIONED STRUCTURES

New solutions for conventional problems are our specialty. Whether custom designed or pre-engineered, Rainier makes lightweight and translucent tensioned structures for permanent shade and shelter applications.

Our qualified team will work with you to develop a custom-built structure to meet any requirement. Elegant and graceful tensioned structure solutions by Rainier enhance public and private settings across the United States.

LARGE FORMAT GRAPHICS

Make a big impression with high-impact, large format graphics. Our teams tackle the most daunting challenges to bring your dynamic imaging solutions to life. We are internationally recognized for innovative environmental graphics applications and fabric printing solutions. Space frame design and challenging locations are a specialty for our team of trained professionals.

IMAGINATION TO REALIZATION

From imagination to implementation, Rainier strives for new and better ways to get the job done. We take your project from design and manufacturing, through permitting and installation, utilizing our professional team of project managers. We start every job with a plan for completing the project on time and on budget.

CASE STUDY: CHOPSTIX DUELING PIANO BAR
SEATTLE, WA
DESIGNER: RAINIER INDUSTRIES, LTD.

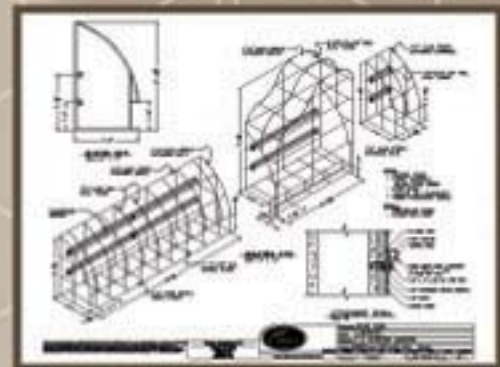

This new dueling piano bar located in downtown Seattle needed impact to draw crowds. The owners worked with Rainier to develop a unique themed awning that really tells a story. From a simple napkin sketch, the piano awning was born. From the initial idea, to concept rendering, to permitting, this awning became reality in less than three weeks. Rainier's production capacity and team of professionals made it all possible. Three more locations are now in the works. Chopstix owner P.J. Pedroni says, "Rainier was amazing to work with. The awning design and function has been a huge part of our success."
