## Introducing the Maximizer Earth Anchor

The Maximizer Earth Anchor is the revolutionary new 'anchoring' product developed specifically for the 'holding' requirements of tents and temporary or semi-permanent structures in the Rental Industry. This 'game-changing' product boast significant benefits over conventional staking methods...

- **Holding Power**  
Superior holding power to conventional stakes
- **Lightweight**  
The aluminum advantage: Shipping cost, on-site handling
- **Durability**  
Cast aluminum 356 alloy aircraft-quality, heat treated to T6 specification (NO CORROSION)
- **Ease of use, Reuse-ability**  
Screw in, screw out. No more sledge hammering!
- **Increased Productivity**  
Quicker installation than conventional staking

Since 1896

## We Know Tents!

We at Rainier Industries are proud of our rich heritage of serving our customers. We realize it takes more than a long history to be successful; we must keep pace with the changing market, maintain the highest standard of quality, and supply the finest products available. Today's consumer demands competitive prices as well as prompt and efficient service. These business practices are our common denominator and ensure your satisfaction.

## Table of Contents:

### **Maximizer Tents ..... 4**

Maximizer Tents has remained the tent manufacturer of choice for over 70 years by continually leading product innovation.

### **Custom Tents & Printed Graphic Tents ..... 8**

Custom Designed, Engineered Fabric Structures, and digital imaging of Printed Graphics – capacity to reach your full marketing potential.

### **Baytex Tent Liners ..... 9**

Baytex Tent Liners redefine any interior space and have been setting the standard for tenting elegance since we first introduced them more than a decade ago. Baytex liners conceal the structural components of tents or outdated décor and provide an elegant background for displaying the finishing touches to make any event spectacular. You can easily add color, lighting, floral designs and special accents to your liners to set the theme for any occasion. Baytex Tent and Structure Liners are precisely engineered and meticulously fabricated to fit and hang perfectly in nearly any frame tent, pole tent, structure or building.

### **Rainier Tent Products ..... 18**

Tent Tools and accessories that are designed to increase your efficiency and upgrade the appearance and performance of any tent system.

### **Party Lights ..... 27**

An exceptional line of tent lights, chandeliers, space lighting, twinkle strings and electrical control devices designed to complement your events and provide years of dependable service.

### **Dura-Trac Flooring System ..... 31**

Dura-Trac SE Flooring System is a revolutionary product designed specifically for the Special Event Industry to install easily and quickly. This highly versatile system can be used as event flooring, staging or even temporary roadway.

standard vinyl top sections.

**Custom colors and fabrics** also available.

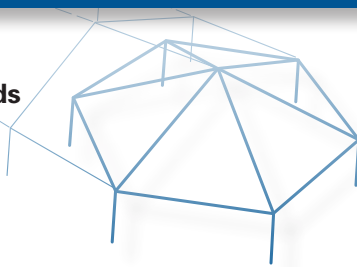

## END OPTIONS

**Conventional Hip Ends**

**Structure Style Gable Ends**

**Hex Ends**

**Stage Covers**

## STRENGTH

Our team can create tents and fabric structures of any size and shape, for any site or application. We have designed, engineered, and fabricated structures for clients in a wide range of industries. In addition to our full range of tenting products, our team can install and take down turn-key tents with all the accessories and features your structure requires.

## Industry Leading

## INNOVATION

Our Maxi Tent design was the first frame tent system to incorporate slide-in vinyl panels. Slide-in technology eliminates the labor hours of lace-up tops and reduces the wear and tear of dragging tops over frames. We continually enhance and improve the system's capabilities and features, so check back often to learn what's new!

## STRENGTH

Our Maxi tent system yields more than six times the strength of conventional 2" tube tents. This engineered strength is the result of our innovative tube designs, as well as the location of structural members that create the triangulation and tension needed to lock-up and stiffen the entire frame. These features make the Maxi tent system ideal for high-wind, semi-permanent locations, or when you simply want the peace of mind knowing that your tent system will stand up to unexpected weather and be ready for your event.

## SERVICE AND SUPPORT

No one in the industry can match the technical expertise and support that we provide. But then, we have been making tents since 1896! Our commitment to you includes:

- 24/7 support for difficult installations
- Current engineering documents to aid in code compliance
- Training for your crews to improve their installation efficiency and safe practices
- Configurable load lists and diagrams to aid with inventory managements and load-out/in efficiency
- Quick and friendly answers to your questions

# The Difference in Maximizer Tent Systems

## Fewer Labor Hours Means More Profits:

Tent rental companies thrive or die by their labor efficiency for each event, so your tent system should make you money every time you set it up. Industry studies have shown that the Maximizer Tent System can improve your labor efficiency by 25% to 50%, delivering the lowest operating costs in the industry.

## Less Inventory:

Tent parts are intentionally designed to be used in multiple locations and in different tent configurations, meaning fewer unique parts to manage and lower overall inventory costs.

## Crew Safety:

Design features of the tent and manufacturing production standards mitigate potential hazards to your install crew like ladder installations, sharp edges on parts or heavy and awkward attachments during installation. Keep your crew healthy and productive!

## Accessorizing Efficiency:

So the tent is up and it's time to decorate...but where do you attach the lighting or the liner? Maximizer tents provide a number of ways to attach décor items, saving you additional labor costs during this phase of event set up.

## Safe and Secure:

Maximizer Tents are engineered strong to meet the latest IBC standards, saving you time and money during the permitting process, and keeping guests safe and secure during challenging weather conditions.

## Printed Graphics:

We can print your graphic on any tent. Ask your representative for more details.

## Longer Life:

Fabric is reinforced at stress points and is made from only high quality materials. Connectors are plated to protect against rust and chipping. All this means your Maximizer Tent system will last longer, require less maintenance, and look better than tents with cheaper components and less attention to detail during manufacturing.

## Flexibility:

Maximizer Tents can be easily expanded or reconfigured to meet the needs of your local market, specific event, or growing business. And because the system uses common parts, the additional investment to adapt your tent is more economic than buying a new tent.

## UPGRADE EXISTING FRAMES

### Conversion Kits for Supertube Frames and All 2" Round Tube Frames

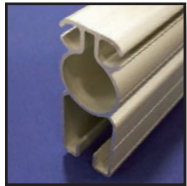

Convert your existing inventory to the MAXI Tube II slide-in track top system. You will immediately reduce labor costs for installing and removing your tent while reducing wear and tear on your top fabric. By upgrading rafters, crowns, and intermediates your current frame is ready for new slide-in tops and the benefits of 20', 25', 30', 40', and 50' slide-in systems. Upgrade to Maxi Lite Track components in light duty 2" tube frames from 10' to 30' wide. Conversion kits are adaptable to any major brand of tents.

■ Retro Frame Parts  
■ Existing Frame System

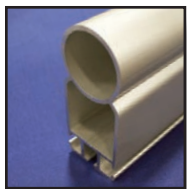

## MAXI FRAME COMPONENTS

Maximizer Tents are the strongest frame tent systems on the market and we have engineering to prove it! The Maxi frame tent system is ideal for high wind or semi-permanent installations where strength and durability are critical. Common tube lengths are used in a variety of tent sizes, configurations, and positions, simplifying parts management and minimizing your investment as your needs change or grow. All connectors are welded steel components assembled in state-of-the-art fixtures to ensure accuracy and are zinc plated to protect against rust. Connectors in the Maxi System have additional drilling locations for cross bolting to increase frame strength when needed in larger frames and are compatible through the entire system. Brace bars connect directly into the function slot of the Maxi Tube II eliminating bolt on brackets. The Maxi frame can be pinned for fast set up or bolted for long term stability. We use the best aluminum alloy to extrude all Maxi Tubes, then clear anodize the aluminum for long lasting protection from oxidation.

### MAXI TUBE II™

Keder tracks allow the tent top to slide into the rafters and sidewall into the legs quickly and easily, while adding greater strength and stability. The bottom "Function Slot" in the Maxi Tube II & Maxi Tube allows easy connection of brace bars and exclusive hanger brackets for décor and lighting elements.

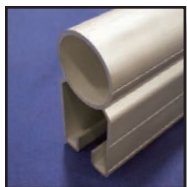

### MAXI IV™

The newest tube in the Maxi line is used for eaves, ridges and hip locations. It allows sidewall to slide into the center track at the bottom and smoothly roll from side to side. Two extra tracks allow for additional connections such as liners, lights, and versatile keder hanger brackets for accessories and décor.

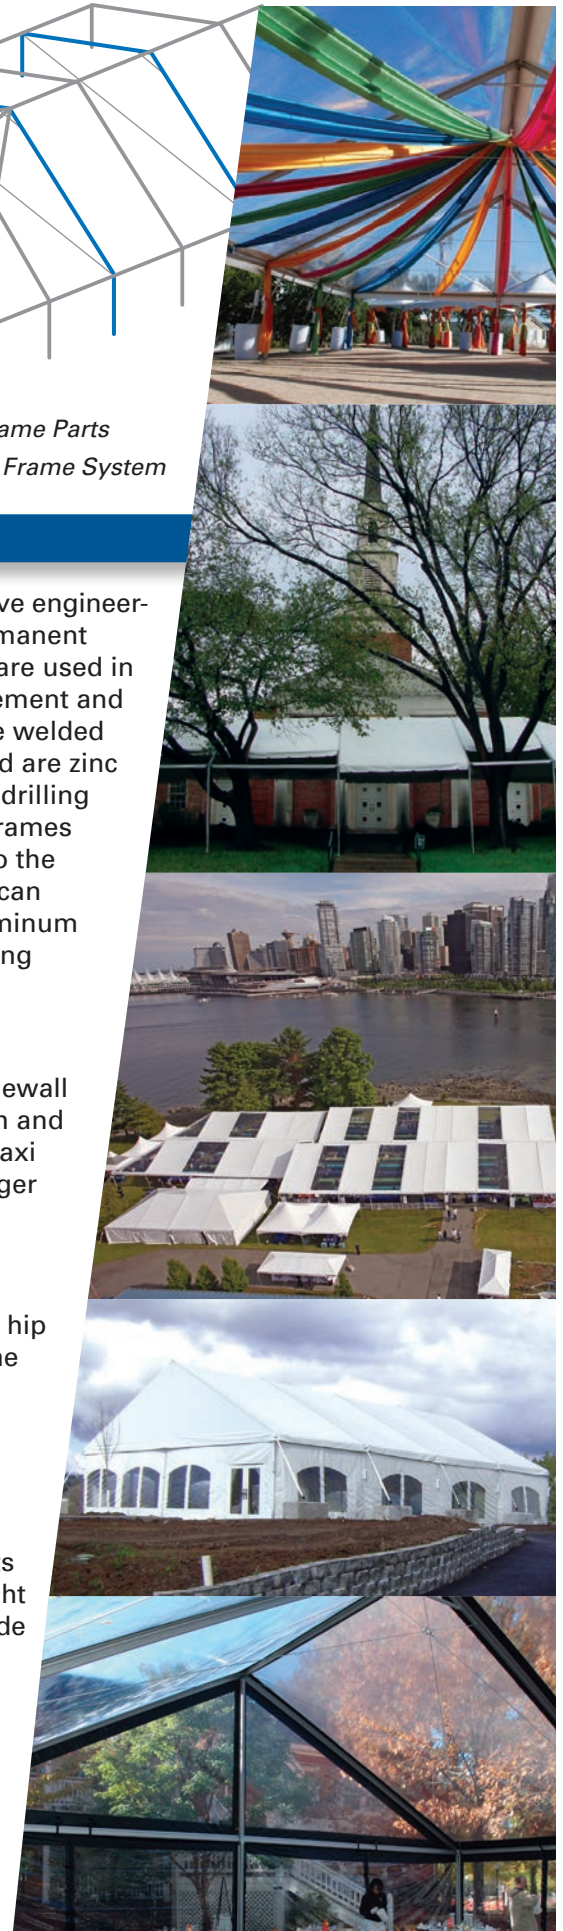

### MAXI LITETRACK™

Get a stronger 2" tube system and all the installation benefits of the slide-in fabric top system for 10', 20', 25', and lightweight 30' widths. The LiteTrack tube provides a cost effective upgrade to this improved technology for existing 2" frame tents.

### MAXI TUBE™

The original Maxi Tube was the first in a series of innovative extrusion designs that offered increased strength over other super tubes without additional weight. It also introduced the "function slot" feature at the bottom of the tube which ensured exact alignment when connecting tubes to fittings.

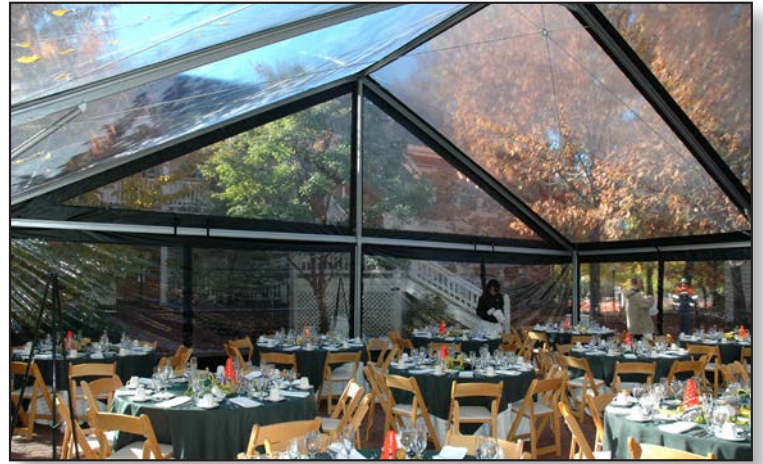

## 10' – 50' WIDE FRAME TENTS

Only Rainier has the Graphics capacity and the imaging experience to offer full decorating services. We create a wide array of visual display products to promote marketing campaigns for a broad spectrum of clients, large and small. When it comes to producing the highest quality image, from concept to completion, you can count on Rainier's experience. Get noticed with our eye-catching digital printing solutions for corporate promotions or personalization of a Rainier Tent.

## CUSTOM SHAPES & SIZES

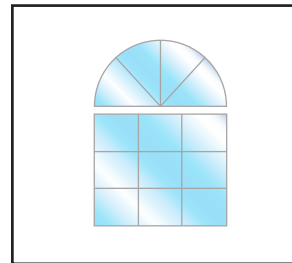

Our team can create tents and fabric structures of any size and shape, for any site or application. We have designed, engineered, and fabricated structures for clients in a wide range of industries. In addition to our full range of tenting products, our team can install and take down turn-key tents with all the accessories and features your structure requires.

## SIDEWALL OPTIONS

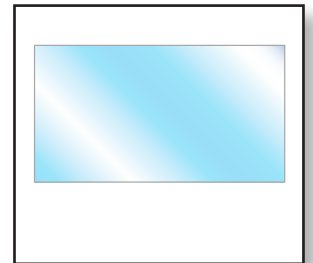

**Maximizer** 2-piece walls have all the high-end features and finishing details to enhance any tented event. Roller wheels at the top of each wall slide easily into the Maxi IV eave, allowing the wall to open and close in minutes as weather conditions change, or to move décor items in or out of the tent. Tie back straps hold the wall neatly open when desired. Edges are constructed with keder to lock the fabric into the Maxi II leg tracks, creating a sealed tenting environment. Other finishing details include: a heavy-duty placket zipper to stop light leak and keep out weather; a bottom pocket to tension the fabric and reduce wind sweep; a 12" ground flap to prevent rain from blowing under the walls. These high-quality walls are also available with Stayput hooks to attach the sidewall to your tents with strap and buckle tops.

**Utility Sidewall** is designed with lighter fabric and less detailing to provide basic sidewall function— and a price that will fit any budget. These one-piece walls install with hooks to your sidewall ropes. Side finish options include overlap, Velcro and grommet. All our sidewalls are available in various grades of block out, translucent and clear fabric, in sizes to fit your specific tenting application. Additional features can be added or altered for the sidewall that exactly meets your needs.

## SIDEWALL WINDOW OPTIONS

## BAYTEX TENT LINERS... THE STANDARD IN EXCELLENCE

*Imagine the Possibilities*

# New Products from Baytex Add Colors!

*Removable Valances and Swags*

## Removable Valances...

Baytex ceiling liners are now available with the option of a standard removable valance. Use the traditional valance or replace it with a set of color swags to add a more formal finish in a color to complement the theme décor.

Swags are available in many colors as well as white and can be used with Removable Valance style Baytex ceiling liners or as a standalone accessory.

Color adds an additional dimension to event décor. Complete liners, leg drapes and sidewall curtains can be made to order in your choice of color.

*Sample Fabric Colors*

*Colored Swags*

*White Swags*

1.800.621.2495

[www.RainierTents.com](http://www.RainierTents.com)  
[tentinfo@rainier.com](mailto:tentinfo@rainier.com)

# Ordinary to Extraordinary

*Frame Tent Liners*

## Installation Ease...

Each liner style comes with installation hardware and easily pull up into the tent top. Liner hardware is attached during the tent set up. After the tent is fully installed the liners simply pull up into place. Ends, gables and mids connect together with Velcro "seams" for a beautiful one-piece appearance.

*Pole Tent Liners*

## Know the Difference...

Meticulously sewn pleating verses 'gathering' distinguishes the Baytex Tent Liners. They are engineered and fabricated to fit and hang perfectly even after years of use.

*Structure Liners*

## Décor Made Easy...

Baytex Tent Liners are the first step in decorating success. They transform any event from ordinary to spectacular, creating exciting visual impressions.

# Pleated & Smooth Styles

*Smooth Tent Liner*

## Distinctive...

Distinct style options give you the choice of either smooth or directionally pleated designs. With Baytex liners you have the advantage to choose the style best suited to your special event..

*High Peak / Marquee Liner.* – Flying Center Pole, High Peak, Marquee, and Hex styles are all available.

# Transform Any Venue...

*Before...*

**Baytex Tent Liners and Structure Liners** – can hide outdated lighting, ceiling and wall treatments, or unsightly surroundings of construction projects.

**Mod Series Structure Liner** – shown with Black Wall Linings and White leg Drapes.

*...and After*

1.800.621.2495

[www.RainierTents.com](http://www.RainierTents.com)  
[tentinfo@rainier.com](mailto:tentinfo@rainier.com)

# Accessories

**Center Pole Drapes** – can be used with or without the ceiling liner to conceal the ropes and rigging.

**Leg Drapes** – provide a variety of decorating options. Fully bloused or straight tailored, the drape conceals the tent leg, tent rigging, electrical and decoration hardware for a totally finished appearance.

## The Finishing Touch

**Baytex Tent Liners** – provide the background for displaying the finished touches to make a party spectacular. The decorator can then add color, lighting, floral design, and special accents to set the theme for any occasion. Liners transform any interior to one with warmth, character and class.

**Brace Bar Covers**

**Side Wall Drapes**

# The Standard Starts Here...

## The Commitment:

Simply to build a better environment for the interior of tents, structures and venues.

At Baytex, our goal is to design elegant products that install quickly, hang beautifully and are easy to maintain.

Custom designs and challenging projects are always considered. Computer aided designs bring us to a quick overview of all projects.

## The Fabric:

Baytex Liners are 100% Polyester fiber. Gathered liners are Silkline PLUS 75 and Smooth liners are Silkline 300. Inherently flame retardant, the fabric meets

or exceeds the NFPA 701 small scale test and California Title 19 standards.

In fact, our new fabric is nonflammable and will not support any flame. Liners and accessories can be machine washed with mild laundry detergent and machine fluffed or line dried. Standard laundry spotters can be used on tough stains and soils.

## The System:

Baytex Liners come complete with installation hardware and durable storage bags. Frame Liners are installed with a crown bridle, lifting bolt, and rope & pulley. Pole Liners include a pole saddle, bail ring, and rope & pulley. Structure Liners are installed with aluminum rails, connectors, and rope & pulley systems. Leg Drapes and Sidewall Drapes attach to the tent sidewall cord with stainless steel hooks. Center pole drapes attach to the pole liner bail ring. Storage bags are color coded by size category (tent width) for easy identification and organized inventory.

## The Installation:

Hardware components are installed during the tent assembly. The liner fabric installs after the tent is completely assembled, in most cases at ground level or eave height, seldom requiring ladders. End and Mid section of Baytex liners are joined together with Velcro seams and overlapping lifting devices so you can easily match your tent size with the modular components. The installation hardware can also be used to lift lighting fixtures or ceiling decor!

# RAINIER TENT PRODUCTS

Great tenting products, easy to use and built to last. All Rainier Tent Products share these traits, so you can be assured that our equipment will help you to do the job with less effort and save you labor costs with every use. Industry-best products not only solve real-world problems, they also help you to distinguish yourself from the competition. Great looking and great performing tenting equipment and accessories provide you the competitive advantage you need to win and retain new clients and set yourself apart from the crowd.

## Doors

### Light Duty Doors

The Light Duty Door system complies with fire codes and features white, powder coated rectangular tube steel tubes, reinforced with gussets. It includes an adjustable closer, base plates, interior push plates and brackets to fit any eave tube. FR Certified Fabric Door Panel is made from B/O white PVC bottom and clear upper – attached with 'stitch track' system – for a super-tight, super-clear and replaceable vinyl panel. Fast, one-person installation. Comes in double or single door configuration.

### Structure Brackets

### Keder Track Repair Tool

Repair dented and damaged keder track in the field. Available in 5/8" and 1/2" diameter.

Description	Part #	Price
Keder Track Repair 15–20mm	1890-0140	\$249.00
Keder Track Repair 13–15mm	1890-0141	\$249.00
Drill-Right	1890-0137	Call for Pricing

### Drill Right

Accurately re-drill your 2" tube. Perfectly aligns holes vertically for faster installs. Works with a standard drill press. Includes drilling fixture and alignment shuttle.

## Vinyl Repair

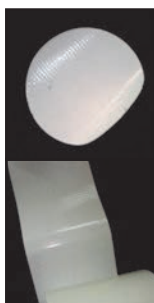

### Vinyl Patch Material

Adhesive back, vinyl patch material. Simply peel, stick, and apply pressure to insure adhesion. Available in a variety of sizes that are perfect for minor repairs to tops and sidewall.

### White Vinyl Patching Liquid

This white vinyl liquid is perfect for patching pinholes or small cracks in white vinyl tops or sidewall.

### Keder Repair Kit

Easily repair torn keder on slide-in tops with the Maximizer Keder Repair Kit. The Kit includes a keder bullet install tool with drill bit, a roll of keder wrapper, HH-66 vinyl glue, silicon roller and fifty keder bullets to help reduce future damage.

**Over \$50 in SAVINGS!**

### Hot Air Welder Kit

The hot air Welder kit allows you to repair vinyl tops and sidewalls quickly and efficiently. This hot air welding kit contains everything you will need to repair your own vinyl.

### HH-66 Vinyl Glue

HH-66 holds vinyl patches firmly in place. Simply apply the glue to the vinyl patch and the vinyl tent surface. When dry to the touch, apply the patch to the tent fabric and press for adhesion.

Description	Part #	Price
Vinyl Patch 2" x 10 yd	1840-0008	\$32.60
Vinyl Patch 2" round strip of 12	1840-0043	\$3.85
Vinyl Patch 2" round 144 qty	1840-0010	\$39.65
Vinyl Patch 2" per foot		\$1.05
Vinyl Patch 4" x 10 yd	1840-0011	\$53.50
Vinyl Patch 4" round strip of 12	1840-0044	\$7.80
Vinyl Patch 4" round 144 qty	1840-0012	\$90.95
Vinyl Patch 4" per foot		\$1.75
Vinyl Patching Liquid 4 oz	1820-0050	\$24.50

## Hooks – Sliders – Keder Bullets

### Sidewall Hooks

Sidewall Hooks are easy to install. Simply punch or drill a hole and press the two pieces together. Made from high impact, reinforced plastics with UV protection. Out performs any metal sidewall hook.

### Keder Slider

Made from high impact plastics, with easy installation similar to sidewall hooks. Will slide in most keder track extrusions.

### Press & Snap Tool

Ensure correct and secure installation of sidewall hooks or keder sliders with a minimum of effort.

Description	Part #	Price
Sidewall Hooks – white ea.	1700-0107	\$1.48
Sidewall Rope Clamp		\$2.50
Keder Slider	1620-0079	\$1.00
Press and Snap tool	1890-0158	\$243.00
Vinyl Drilling Tool	1890-0150	\$24.00
Roller Wheel	1700-0106	\$4.10
Keder Bullet	1700-0097	\$2.65
Keder Bullet Installing Tool 11 mm	1890-0145	\$34.95
Keder Bullet Installing Tool 13 mm	1890-0146	\$34.95
Keder Bullet Install Kit	1890-0229	\$159.95

### Vinyl Drilling Tool

Replaces the common hole punch, and works in any drill. A high impact, yellow plastic backer is used to drill against. Makes a perfect 1/4" hole for sidewall hooks or keder sliders.

### Keder Bullets

Keder bullets are made from high impact Delron plastic. The tapered bullet guides the keder bead on your fabric through the aluminum keder tracks during installs, reducing abrasion and extending keder life. Installs in minutes.

### Roller wheels

Roller wheels replace hooks on tent sidewall for smooth movement of sidewall along the eave tube. Other benefits include elimination of sagging sidewall rope, no hooks or Velcro to come loose, and improved environmental seal between the eave tube and the sidewall. Simplifies use of a two-piece sidewall.

### Keder Bullet Install Tool

The steel drilling guide slides over the end of the keder bead to assure proper centering of the drill hole, and accurate keder bullet installation. Guides are available for 13mm and 11 mm keder. Includes a standard drill bit.

### Keder Bullet Install Kit

This useful kit includes everything you need to install keder bullets using a standard drill: a keder bullet install tool, drill bit, allen wrench, and 50 keder bullets.

## Vinyl Cleaning

### Tent Wash 101i

Designed to clean vinyl tents and party equipment. This heavy-duty detergent is formulated to clean the most difficult, soiled surfaces. Excellent for spray-on, wipe-off hand washing and spotting for quick touch up of party products.

### Spotter 86i

Completely safe citrus formula for stain-removing applications.

Description	Part #	Price
Tent Wash 101i – 1 Gallon	1830-0016	\$22.50
Tent Wash 101i – 5 Gallon Pail	1830-0018	\$75.00
Tent Wash 101i – 55 Gallon Drum		\$788.00
55 Gallon Drum Pump		\$109.00
Spotter 86i – 1 Gallon	1830-0019	\$22.50

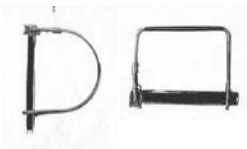

1.800.621.2495

www.RainierTents.com  
tentinfo@rainier.com

### Bail Pins

Bail pins are the safest connecting pins, due to the spring-loaded ball. Available in 3/8" diameter pin with square bail or 1/4" diameter pin with round bail.

### Quick Pins

The quickest way to connect frame canopy tent systems, round pipe or tubing. Maxi Quick Pins are easily inserted into tubing with light pressure, but the correct tension prevents them from backing out.

### Carabiner

Maximizer carabiners are ideal for attaching tail ropes and straps to tent hardware. All internal parts, including the springs and rivets are stainless steel. Rated at 6,000+ lbs. break strength.

### Pin Pouch

Keep pins handy and ready to use at all times with this convenient pin pouch.

Designed to hang on an installer's belt at the hip position. **Free Pin Pouch with 3,000 Pin purchase.**

PINS	Description	Part #	Price
Bail Pin 1/4" (Round Bail)		1700-0337	\$0.70
Bail Pin 3/8" (Square Bail)		1700-0338	\$0.90
Quick Pins 2" Silver		1700-0335	\$0.31
Quick Pins 2" Silver Carton 1000			\$285.00
Carabiner		1700-0103	\$6.95
Pin Pouch		1700-0365	\$9.95

### Ratchet Straps

Ratchet straps are made for various applications, including top tensioning or out guying. Ratcheting makes tightening or tensioning adjustments easy. White, vinyl-impregnated strap material makes them easy to clean and very durable. Vinyl covers, with Velcro closures, are attached to conceal ratchet and contain the excess strap for a finished look.

## Mounting Hardware

### Function Slot Bracket

For use with Maxi, Maxi II or Future track tubes, this bracket enables the attachment of lighting, fans, or any other accessories to the rafters.

### Function Slot Eye Bolts

Function Slot Eye Bolts provide an easy connection point for accessories. Designed to be installed after the rafters are in place. Simply slide the wing into the function slot, turn it 90° and tighten.

### T-Bar Light Bracket

Mount lighting or other equipment to slide track or 2" tube rafters easily and securely. White powder coated 1.5" tube with adjustable 24"-36" drop sleeve. Dual-directional pinning for 30" mounting perch. T-Bar perch accepts 2" clamps.

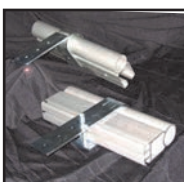

### Stage End Bracket

Structural Brace Bar for Stage End Systems

### \*Eave Strap Keder Adapter

Necessary for Strap n Buckle systems when using Maxi Roller Wall.

### Rain Gutter Mounting Bracket

Two bracket designs are available for securing gutters to tent frame eaves, depending on the eave tube orientation. The bracket saddles the eave tube to support fascia board and rigid PVC gutters.

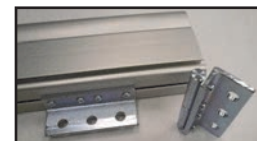

Attaches to 2" and super tubes.

Description	Part #	Price
Function Slot Bracket	1620-0073	\$26.95
Function Slot Eye Bolt	1620-0071	\$10.00
Function Slot Bolt w/ Wing Nut	1620-0070	\$6.50
T-Bar Light Bracket, White Powdercoat	1700-0395	\$149.00
Rain Gutter Bracket 26°	1620-0077	\$36.00
Rain Gutter Bracket Vertical	1620-0043	\$36.00
4" Keder Slider Bracket	1620-0074	\$25.00
Crutch Leg Bracket – A 26° Plane	1620-0061	\$45.00
Crutch Leg Bracket – B Vertical Plane	1620-0088	\$45.00
Cast Brace Bar Bracket	1620-0089	\$24.00
Maxi IV Eave, Roof Strap Adapter	2030-0069	\$9.95

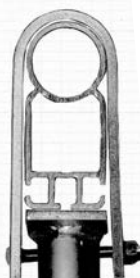

### 4" Keder Slider Bracket

An adaptable hanger bracket designed for the Maxi IV eave & ridge tube. The barrel inserts into the edge keder channels or center function slot as needed. Tighten the screws to hold the bracket in place.

### Intermediate Crutch Leg Bracket

A crutch leg bracket allows you to connect either single tube or double tube legs at any place outside the standard eave connector. Two styles are available. **Style A** for all 2" and eave tubes oriented in a 26° roof plane in a standard 1/4 pitch tent. **Style B (shown)** is for most super tubes that are orientated in the vertical position around the eaves of the tent. This bracket accommodates up to 4 1/2" of tube depth.

### Cast Brace Bar Bracket

Allows for mounting a T-Bar to a 2" tube or bolt to bracket as needed.

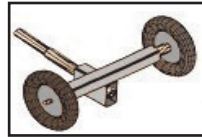

**Tent Jack**

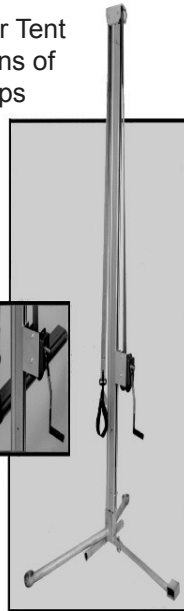

Make installation safer and quicker with a Maximizer Tent Jack. Lifts 1,500 lbs up to 12', with 1/3 the crank turns of other standard jacks. Easily replaceable winch, straps and base. Available with wheel or tripod base.

**Keder Feeder**

A pair of keder feeders makes installation of slide-in tops faster and easier. They reduce damage, snags and tears when pulling tops into frames.

Jack Wheel Base

**50' Ratchet Strap**

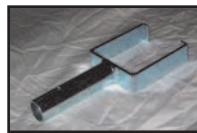

This strap was designed to use like a come-along when portions of a tent need to be pulled together from a long distance. Ideal in western frames when interior cables need to be removed or reinstalled.

**Keder Pull Guide**

The guides can be used in tandem with keder feeders and the Maximizer Tent System, or as a stand-alone tool with other brands of tracked tent frames.

**Slide Track Install Kit**

The kit includes all the basic tools needed to make tent installation fast and efficient. Available with pull ropes and tools for frame widths to 50', or structure widths to 50M.

Description	Part #	Price
"Force" Stake Puller	1890-0134	\$3,995.00
Stake Puller - Original		
- Extra Small Mouth	1700-0379	\$244.00
- Standard Mouth	1700-0380	\$244.00
- Large Mouth	1700-0381	\$244.00

- Extra Small Mouth	1700-0376	\$294.00
- Standard Mouth	1700-0378	\$294.00
- Large Mouth	1700-0377	\$294.00
Extra Small mouth <1" stakes	1700-0383	\$40.00
Standard mouth 1" stakes	1700-0384	\$40.00
Large mouth 1 1/2 & 1 3/4 stakes	1700-0385	\$40.00
Tent Jack with tripod base	2090-0042	\$589.00
Tent Jack wheel base	1700-0485	\$99.00
Jack Mast 116 Tube	1700-0372	\$250.00
Jack Winch 1500 lbs rated Assy	1700-0643	\$145.00
Jack Strap Hook Assembly	1700-0345	\$47.00
Truper Sledge	1890-0135	\$119.00
Keder Feeders (Pair)	1890-0144	\$169.00
Install Kit - Frames to 50' wide	1890-0202	\$319.00
Install Kit - Structure to 50M wide		\$429.00
Purlin Fork Head	1890-0142	\$21.00
50' Ratchet Strap		\$79.00
Grip-It - equipment mounted	1890-0138	\$9.95
Grip-It - hand held	1890-0139	\$24.95
Keder Pull Guide (Pair)	2030-0070	\$39.95

**Grip It**

The Grip-It provides a non-abrasive, tight grab of vinyl edges for pulling fabric where and when you need it. Ideal for grabbing fabric to be hung or pulled during maintenance operations.

**Purlin Fork Head**

Designed with "top ears" to make it easy to pull down, as well as push up, on purlins during installs. Fits onto any standard 2" tube.

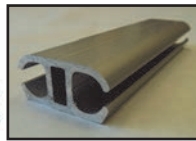

## Tubing

**Keder Extrusion**

23-F

23-S

Double Keder  
47 Dual

Keder Extrusions can be attached to frame components, buildings, and other support structures to securely and attractively connect kedered vinyl panels. 23-F / 23-S available in up to 14' lengths. Double extrusion up to 20' lengths. All extrusions can mount in series for longer application.

Description	Part #	Price/ Foot
Keder Extrusion Front 23-F	1210-0029	\$6.00
Keder Extrusion Side 23-S	1210-0030	\$6.00
Keder Extrusion- Double	1210-0031	\$7.00

### Stake Pullers

An excellent hand operated puller for most stake removal applications. A round pivot base provides better leverage than other pullers. Three sizes of interchangeable mouths fit all stake sizes. Zinc Chromate plated to prevent rust. Now available in two styles. The extra 12" length gives extra pulling leverage and 12" shorter body makes storage & shipping easier. The new handle is knurled for non-slip grip.

Extend-able  
Handle in  
storage  
position

Stake puller mouths

### Truper Sledge

The lightest weight, most efficient sledgehammer in the industry. The truper's extra large aluminum alloy head offers 183% more striking area and weighs only 10lbs.

### "Force" Stake Puller

The "Force" stake puller has been designed by industry experts to increase your stake-pulling efficiency and save you time and money. This unique piece of equipment will reduce labor time and effort by 70–80% and will easily remove the toughest tent stake.

One person can maneuver and operate this machine with ease because of its 14" never-flat tires. The frame is constructed of high-quality, heavy duty square steel tubing and is powder coated for durability and long-life.

The powerful pump provides 3000 psi to the 2-1/2" hydraulic bore cylinder, producing a pulling force in excess of 10,000 lbs. The stake puller Force even does an excellent job of removing stakes from asphalt without buckling the surface.

**Remove  
Tent Stakes  
with Ease!**

- Honda Power, 160cc Engine
- Two-Stage Hydraulic Pump
- Detent Valve
- 16" Stroke
- Hardened Pulling Yoke
- 14" Never-Flat Tires
- One Person Operation

### Out Guy Strap

White vinyl impregnated strap material makes these straps easy to clean and durable. A vinyl fabric covers encloses the excess strap for a finished look. 1" tubular webbing on the end of the strap allows it to be tied or looped over any tent stake or attachment.

Description	Part #	Price
Out Guy Strap—2500#	2030-0008	\$45.00
Top Tension Strap w/ Fabric Loop—2500#	2030-0007	\$45.00
Top Tension Strap—1"—500#	2030-0043	\$36.00
Load Distribution Bar 3-Hole 32" x 2" x 2"	1620-0045	\$38.00
White Stake Caps Heavy duty plastic 100 per carton	1700-0334	\$89.00
5000# Ground Ratchet with Strap	1700-0366	\$52.00

### Load Distribution Bar

A stake bar with integrity. Field developed utilizing industry proven stake spacing. The 32" is made from 2" x 2" steel, has integrated hitch rails for tie points and holes for 3 or 4 stakes.

### Plug-R

A specially formulated asphalt plug that permanently fills stake holes. Cold weather won't crack it, hot weather won't melt it. Easy to use, store and transport. No extra filling necessary.

### Tent Stake Caps

Hide tent stake tops with press-on, heavy-duty plastic stake caps. The caps protect and camouflage stake heads, blending with rigging, sidewalls and tent liners.

Plug -R size	Part #	Approx Stake size	Quantity	Price
3/4"	1700-0362	3/4"	Case 512	\$315.00
7/8"	1700-0363	1"	Case 320	\$288.00
1-1/8"	1700-0361	1-1/4"	Case 176	\$275.00
1-1/4"	1700-0360	1-1/2"	Case 112	\$299.00
1-1/2"		1 3/4"	Case 96	\$290.00
1-3/4"		2"	Case 64	\$390.00

### Ground Ratchet

Ground ratchet with 10,000# strap for single stake outguy anchoring.

# PARTY LIGHTS

## THE COMPLETE PARTY LIGHTS LINE

### Chandeliers

Engineered in white PVC resin material that won't rust or fade and is easy to maintain. Chandeliers are available in three sizes, proportionally designed for standard tent widths.

*Light bulbs not included.*

#### 1-Globe

[M302] with 12" Globe.  
Designed for tents  
10' wide.  
(Max. 100 Watts)

#### 4-Globe

[M208] with 8" Globes.  
Designed for tents  
10'-20' wide.  
(Maximum 240 Watts)

#### 5-Globe

[M209] with 10" Globes. Designed for tents  
30'-40' wide. (Maximum 375 Watts)

[M211] with 12" Globes. Designed for tents  
40'-50' wide. (Maximum 500 Watts)

### String Lights

Great for outlining tent eaves and ridges or anywhere to strike a mood. Easy to install, each lamp base with 6" globe has a stainless steel hook and hangs on any perimeter cord or sidewall line. Available with virtually unbreakable white or clear prismatic polycarbonate globes. Each string has a lead power cord and pigtail for connecting extensions.

*Light bulbs included.*

#### Coil Cord

Allows placement flexibility from 2 feet to 4 feet between each globe with retractable cord.

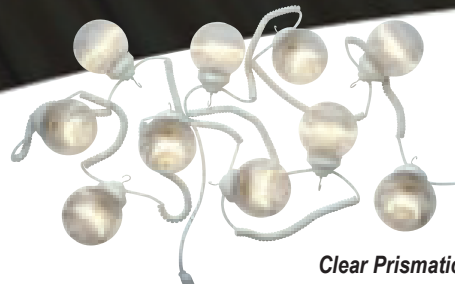

#### 10-Light String

[M210] spans 24 to 40 feet.  
(400 Watts)

#### 5-Light String

[M205] spans 12 to 20 feet.  
(200 Watts)

*Note: Two 10-Light Coil Cord Strings fit the perimeter of a 20' x 20' tent. Each 5-Light string adds up to 20' length.*

*Clear Prismatic*

#### Straight Cord (Not shown)

Cord length between lights is 5 feet for standard 10 foot tent leg spacing.

#### 8-Light String

[M228] spans 40 feet. (320 Watts)

*Note: Two 8-Light Straight String fits the perimeter of a 20' x 20' tent.*

### Opti-Par Lighting

The Opti-Par is a specially designed reflector for higher output than conventional Par Cans. 120V, 575 hogen lamp shoots a clean white beam. Interchangeable lenses make it simple to change beam angle.

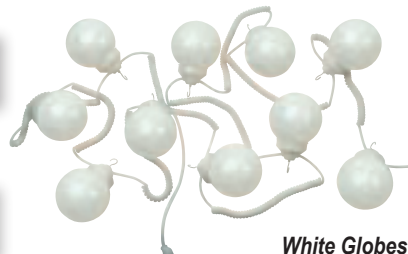

Includes: clamp, gel frame, cable with plug, wide lens and 575W Hologen lamp.

*Available in White or Polished Aluminum Finish.*

### Stage Lights

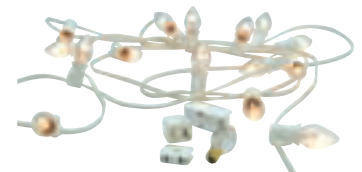

### VIVO Lights

*White Globes*

### VIVO Lights

Ideal for decorating tent interiors, tent liners, arches, gazebos, trees, or any where you want to create a starry effect. Master Kit includes 250' of white 18/3 light string with 12" socket spacing, clear bulbs, connectors, and tie wraps. Bulbs are available in either steady or twinkle and come in a ready-to-assemble kit. Bulk purchase available.

# PARTY LIGHTS

## THE COMPLETE PARTY LIGHTS LINE

### 1-Globe

[M109] 72" high with 12" Globe. (Max. 100 Watts)

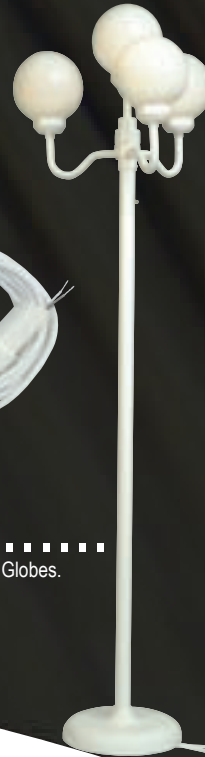

### Adapter

[M214] Converts either Floor Lamp top to a Chandelier.

### 4-Globe

[M202] 78" high with 8" Globes. (Max. 240 Watts)

## Floor Lamps

Designed for safe, long and trouble-free service. Constructed from white PVC resin material with weighted bases to ensure stability. Floor lamps are available in two styles, each with three-level dimmer switch for that "just right" atmosphere. Each fixture has a 20 foot power lead cord and pigtail for connecting extensions.

*Light bulbs not included.*

Max Wattage	Globe Size
100w	12"
75w	10"
60w	8"
40w	6"

*\*Incandescent bulbs*

### 2000 Watt Dimmer GFCI

Provides flexible control of your overhead lights. 2000 Watt capacity, 20 Amp, 120 Volt GFCI with water tight cover. Meets OSHA and NEC Standards. Durable waterproof, heat dissipating boxes. Twenty two feet of 12/3 lead and 2 foot pig tail.

### 600 Watt Dimmer

One 600 Watt dimmer controls grounded duplex receptical.

*Note: Dimmers are not compatible with self-dimming lights.*

### Dual 600 Watt Dimmer

Two 600 Watt dimmers controlling grounded duplex systems.

## Dimmers & GFCI

### T-Bar Light Hanger

The perfect solution for mounting par lights. White powder coated 1.5" pipe with adjustable 24"-36" drop sleeve. Dual directional pinning for 30" mounting perch. Comes with Maxi tube function slot bracket or 2" tube bracket.

### Triple Tap Extension 12/3 Gauge

25' length.

### 14/3 Gauge

25' & 50' lengths.

### 12/3 Gauge

25', 50' & 100' lengths.

## Extension Cords

All-white extension cords to easily camouflage in your party tent environment. Available in 12/3 & 14/3 wire gauges, 15A-125V, water & flame resistant, -40° Coldwater jacket.

Select the Proper Cord		
	14 Gauge	12 Gauge
50' or less	Up to 15amps	Up to 15amps
50'-150'	Up to 13amps	Up to 15amps
At US Voltage: 13amps = 1625watts; 15amps = 1875watts
