

**Rainier Shade
Power Screens**

Save Energy and Cool Naturally

Dynamic by Design

Enjoy the outdoors on your terms! With the touch of a button, a power screen from Rainier will enhance your home and provide shade, energy savings, and ventilation. Rainier has a history of providing exceptionally crafted, custom-made retractable shading systems. Our tradition of quality guarantees a sound investment in your home's comfort and elegance.

Block the Sun, Not the View

Designed to filter out most of the sun's harmful effects while preserving your outdoor view and allowing you to better control your interior lighting. Our product reduces glare on computers and television screens and diminishes the harmful UV rays that fade furnishings and flooring.

RAINIER SHADE

RainierShade.com

Side Retention System

Performance Under Pressure

Our SRS™ System is one of the strongest retention systems available in the market today. Designed to keep the screen mesh stable and allow for worry-free use of your screen, even in windy conditions. Unlike other screen systems, your Rainier SRS™ power screen can be left down when light wind blows.

Recessed SRS™ Option

Design Your Porch Around Your Screen

The recessed SRS™ tracks blend seamlessly into the house like a fine architectural accent. This streamlined application is designed for installation during construction. When the screen is lowered, it keeps you cool. When it's retracted, it vanishes.

Cable Option

Sleek, Stylish, and Subtle

The cable option is perfect for homes that call for a low-profile approach to avoid interrupting the style or architecture. Our screen's minimalist profile blends in to your home's exterior. Made with the same parts and quality as our Side Retention System, cables are used to guide the screen fabric as it is lowered or raised.

Save Energy and Cool Naturally

Cool your home naturally with a Rainier power screen to reduce heat gain and decrease your reliance on traditional air conditioning. Research has shown that in many homes, exterior shading systems can reduce cooling costs up to 60%. In addition, Rainier is deeply committed to respecting and protecting our environment.

Traditional & Contemporary Design

We offer two design choices for our Power Screen housing. Our new square housing is a great option for more modern or contemporary homes. Our traditional, more rounded design is the most popular amongst homeowners and where our journey into power screens started.

Square housing
available on Series 4
and Series 5

Where Quality is Timeless

Rainier was founded in 1896 and has earned our reputation as a provider of superior quality products. Each Rainier Screen is TUV Certified with a unique serial number. This seal indicates that the screen has been exposed to rigorous independent testing and complies with all endurance safety standards required for listed electrical products. This certification shows that we are held to a much higher standard than our peers, producing the most reliable and safest screen systems in North America.

Fabric, Styles, and Colors

Rainier Screens are available in a wide range of fabric, style, and color options. They can block the sun and keep your view or provide complete blackout if desired.

Durable Frame Colors

Rainier power screens are available in sixteen standard frame colors. Every screen is built to order with powder coating done in-house, resulting in a beautiful appliance-like finish and requiring little maintenance. Custom colors are also available at an additional cost.
